Utility Management Portal

Take control of your utility costs...

At Full Power, we're always working hard to reduce your gas, electricity and water costs, along with the time required to manage these utilities. That's why we've just launched the new Full Power Utility Management Portal. Now you can get instant access to your utility bills and contract information, from wherever you are, 24 hours a day.

- Stay in control of your utility costs with instant access to your bills anytime, anywhere.
- Save time - all your bills, from all your utility suppliers in one place, even when you transfer your supply.
- Fully automated service with bespoke notification options to alert you of new bills and contract renewal dates.
- Effectively manage your multi-site operations, with multi-level access for your workforce.
- View energy consumption trends across your portfolio, with easy to understand energy reports.

Bill Validation

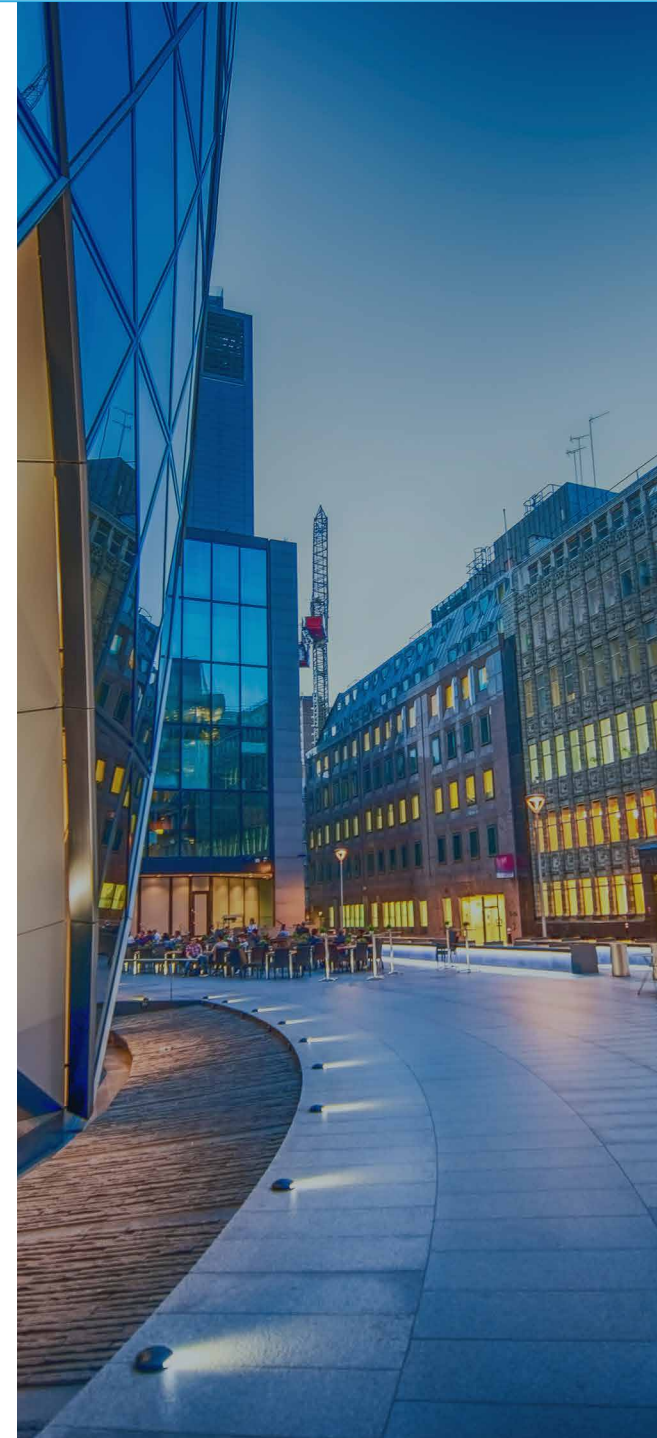

Through Full Power's utility procurement service, you can be sure that you have secured the most competitive and suitable supply contracts for your operations. Now you need to ensure that you are being billed correctly by your chosen suppliers. Full Power's automated bill validation service can take care of this.

- Automatic validation of every new bill you receive.
- Ensures the correct tariff details are being used.
- VAT and CCL validated against site/building use.
- Bill consumption data compared to customer meter readings or actual meter readings where available.
- Monthly bill validation summary reports.
- Bespoke alarms to notify you of any potential billing issues, allowing you to intervene before payment is taken.

Energy Analytics

Dig deeper into your energy consumption and identify new ways to reduce your gas and electricity costs.

- Detailed energy use profiles - understand where and when you are consuming energy.
- Compare multiple meters and sites to help spot trends and review performance across your portfolio.
- Automatically create and share reports with key individuals within your organisation.
- Set consumption targets across your portfolio and create automated alarms for when targets are exceeded.
- Gain a deeper insight with the addition of half-hourly data.

Pricing

Access to the Full Power Utility Management Portal is priced on a per-meter, per-month basis, which is bespoke quoted, depending on your portfolio size and reporting requirements. The more meters you have in your portfolio, the most cost effective the solution becomes.

Whilst the portal can be of benefit to any commercial consumer of gas, electricity and water, as a starting point we suggest a minimum annual spend, across the three utilities, of £50,000.

Video demonstration

To see the portal in more detail, you can watch our five minute video demonstration at the following link - https://youtu.be/h6_o9-zrTaA

Book a live demonstration

If you would like one of our experienced team members to give you a more detailed demonstration and to discuss your specific utility management goals and requirements, contact us today.
